TOPO

A COLLECTION DESIGNED BY STEPHANIE DYER

Created by Portland designer Stephanie Dyer, these unique 6 X 6 dimensional decorative tiles were designed exclusively for Clayhaus.

"This collection began as an exploration of three-dimensional organic forms that evolved into a playful relationship between micro and macro worlds. In separating the forms into layers, an imaginary landscape, or topography, began to surface. The result is a subtle play of the imagination — that one might, if only for a moment, envision a micro version of themselves scaling a vast and seductive terraced landscape, and emerge having gained an appreciation for the grander, patterned order at work."

— STEPHANIE DYER, DESIGNER

STEPHANIE DYER, INTERIOR DESIGNER

At her Portland, OR studio Stephanie uses design to externalize clients' inner landscapes. She works to dissolve the boundaries between people and environment, marrying identity and inspiration to the bones of a building, where every detail is considered in timeless, unrepeatable compositions. Her instant connection with the Clayhaus duo was borne out of their shared love of the handmade.
