

VIA

DESIGNED BY KRISTINE MORICH

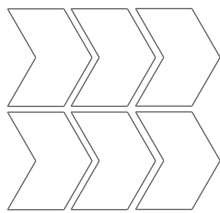

Patterns in our built environment create character, tell stories, and bring spaces to life. Tile can take an ordinary wall from a flat plane to a surface with depth and character. The Via collection, designed by Kristine Morich, draws on a rich history of decorative tilework found in the Andalusian region of Spain. The striking geometric patterns of Via merges Spanish motifs with contemporary style.

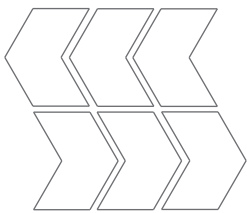

The Via Collection is composed of only four tile shapes—the hex, diamond, small dart, and large dart. But with this simple assortment, multiple patterns can be created, and when combined with our extensive palette the variations are endless.
